

Smart Home

Hints & Tips

With so many different smart home devices about, it can be hard to know what devices do what and where to start!

To help make it a little simpler, we've provided some hints and tips to help you through the process of creating your perfect smart home...

Set up a smart plug

Are you someone who often forgets if they've switched the lights off, or if the hair straighteners are still on? With a smart plug, there's no need to worry! Put your mind at ease and know you're in control with a smart plug.

Use your voice

If you live a busy lifestyle, a voice assistant can help to make your daily duties a little easier. Ask questions, set up schedules and connect it to other smart devices within the home, all with your voice.

No need for keys

Smart locks can provide you with much needed convenience. Accessed with your smartphone, key fob, keypad or key card, there's no longer a need for keys. Know your home and loved ones are safe from anywhere, with a smart lock.

Working together

Find a system which works for you. Many smart products integrate with each other, talking to each other, making your smart home smarter. Simply use your voice to arm your alarm or even unlock your front door, it's never been so easy.

Keep it secure

Never in when your delivery arrives? A smart delivery box can keep your parcels safe and secure, until you get home. Controlled through your smartphone, you can be sure you'll never miss a delivery again.

Be in the know

Smart cameras, both inside and outside the home, can help keep you in the know. Monitored through your smartphone, with night vision and notification alerts, you keep an eye on your pets, loved ones and any unwanted visitors, from anywhere.
